Hi Madi,

That's a good clarification. Please see the attached revised version with the requested edit. Thanks!

Thank you Eron, this FCR looks good. Just an editorial suggestion to include the word "Shelby" as indicated in the sentence below:

"The sampling will be conducted using a combination of either 2.5 ft or 5-ft long by 3-inch diameter **Shelby**tubes and a sonic core barrel sampler with a flapper to retain the sediment".

Thank you,
Madi

Hi Madi,

As I mentioned in my voicemail message, attached is draft FCR-14 for using a sonic core barrel sampler to get better sample recovery.

Please let me know if you have any questions. Thanks!
